

Senior Actuarial Consultant

Location: Sydney

Type: Permanent, Full Time Position

Company Overview

Dataly Actuarial is a dynamic and rapidly expanding consulting firm, specialising in providing dedicated support to life insurers and reinsurers in Australia, New Zealand, and Asia. Focused on actuarial, data, finance, and business domains, we offer a comprehensive suite of services, spanning data analytics, business transformation, integration programs, and traditional actuarial functions. Our accomplished team, consisting of over thirty-five qualified actuaries, actuarial consultants, and data specialists across Australia and New Zealand, is poised for further expansion. Since our successful establishment in Australia in 2019, Dataly Actuarial has forged enduring client relationships, marked by the delivery of high-calibre work. This success has propelled us into a phase of significant team growth to meet the escalating demand for our services. As we continue to evolve, we are actively seeking talented individuals to join our team and contribute to the next chapter of our success story.

About the role

Joining Dataly Actuarial as a Senior Actuarial Consultant means taking a central role in delivering exceptional actuarial services to clients in the Australian financial services and life insurance industry. The ideal candidate, with substantial experience in pricing or valuation roles and robust consulting skills, will be a driving force behind client success.

As a Senior Actuarial Consultant, you bring a wealth of experience to the team. Your demonstrated skills encompass Australian financial services and life insurance industry expertise, proficiency in data modelling and system development, and technical prowess in emerging technologies, all while adhering to high service standards. Effective communication with clients and internal management is paramount, involving the translation of intricate technical analyses and systems into comprehensible business insights for informed decision-making and successful outcomes. Additionally, you play a crucial role in collaborating on and supporting Dataly Actuarial programs, systems, and tools. Your active contribution to both your own and the team's professional development is vital, ensuring you stay current with knowledge, technologies, and advancements in the data, financial services, and life insurance industries.

About you

Prerequisite is the rights to live and work in Australia.

- **Qualifications:** Actuarial Tertiary degree with advanced progress towards FIAA qualification (or equivalent) or recently qualified.
- **Experience:** 3-5 years of work experience in the Financial Services or Life Insurance Industry, specializing in either valuation or pricing domains.
- **Competency:** Knowledge and proficiency in actuarial techniques and the life insurance regulatory framework.
- **Technical Skills:** Experience in extracting, cleansing, and analysing data. Exposure to Data Visualization tools is advantageous.
- **Communication:** Excellent verbal and written communication skills.
- **Professionalism:** Acts professionally, ethically, and with integrity, setting an example for the team.
- **Skills:** Attention to detail, strong analytical and problem-solving skills.
- **Attitude:** Flexible, proactive, and collaborative.

Culture

We cultivate a work environment experience that is supportive, inclusive, and respectful, fostering the development of skills and tools both for your professional and personal growth.

With an excellent team to support you, and guided by our values, we in turn aim to deliver positive outcomes for our clients.

Benefits

- Market competitive remuneration package
- Flexible working arrangements
- Parental leave
- Career development opportunities
- Work in a friendly, caring, and dynamic team environment.
- Diversity of experience working on different projects for different clients and different markets (Australia, New Zealand, and Asia)
- Opportunity to both expand your life insurance expertise and develop your skills to gain experience in other non-insurance industries.

A career with us – How to Apply
